📇 SUMMARY

Lead Mobile Developer with 2 years of experience in developing mobile applications using Flutter. Experienced in creating applications from the ground up, with a solid understanding of full-stack development tools. My experience engaging in startup environments has equipped me with the soft skills and adaptability to thrive in diverse work settings and make a meaningful impact.

🔧 SKILLS

Mobile App Development — Dart ∣ Flutter ∣ Kotlin ∣ Firebase ∣ Android SDK ∣ Android Studio

Web Development — HTML ∣ CSS ∣ JavaScript ∣ React ∣ npm ∣ Node.js

REST API Integration — API design and development ∣ Data fetching and manipulation ∣ Authentication and authorization implementation ∣ Error handling and optimization

Version Control / Collaboration — Git ∣ GitHub ∣ Jira ∣ Asana

SOFT SKILLS — Problem Solving ∣ Collaboration ∣ Creativity ∣ Time Management ∣ Self-Learning

💼 PROFESSIONAL EXPERIENCE

Allcarta, Lead Flutter Developer 🔗   2023/10 – present ∣ Tunis, Tunisia

Managed a team of three in the full lifecycle development of two mobile applications, emphasizing project planning, task delegation, and timely delivery while upholding high code quality and security standards. Tools: Flutter, Dart, GetX, MVC, Local Storage, Multilingual Support, Firebase (Push Notifications), API Integration (Authentication, Data Management), Git, and Asana.

- Delivered two applications 20% ahead of schedule through effective team leadership.
- Optimized code to reduce app loading times.
- Improved user engagement with enhanced navigation and UI features.
- Implemented UI/UX improvements, increasing user and client satisfaction.
- Swiftly deployed applications to gather feedback, improving app retention by 15%.
- Streamlined development cycles by 30% through efficient task management in Asana.
- Achieved a 95% user satisfaction rate based on continuous feedback from over 500 users.

Tnker, Internships 🔗   2023/03 – 2023/09 ∣ Remote, Tunisia

Contributed to a 5-member mobile development team to build and enhance mobile applications through collaboration and agile practices. Tools: Flutter, Firebase, GPS, Multilingual Support, Real-time Messaging, Clean Architecture, MVVM, Provider, Bloc, Stacked, Injectable, Jira, Discord, and Figma.

- Participated in daily and weekly meetings to discuss project progress and coordinate tasks via Jira.
- Developed the UI for the new Market Place section, adhering to Figma designs.
- Implemented Google and Facebook authentication buttons for seamless user login and account creation.
- Assisted in implementing multilingual support for a broader user reach.
- Contributed to real-time messaging and booking logic features, boosting user engagement.

- Collaborated with the team to apply Clean Architecture principles for maintainable code.
- Worked with designers to refine UI elements, enhancing user interface intuitiveness.

Royale textile, Project manger   2019/07 – 2021/11 | Sousse, Tunisia

Oversaw project operations and team management to ensure seamless execution and client satisfaction.
- Managed personnel and delegated tasks to optimize team performance and ensure timely delivery.
- Handled client requests and maintained open communication to align project goals with expectations.
- Conducted one-on-one meetings with team members to monitor progress and address challenges.
- Coordinated factory needs and resources to ensure smooth operations and adherence to timelines.
- Implemented quality control measures to uphold standards and deliver high-quality outputs.

Fares Traveux Public, Executive Chef Logistique   2016/03 – 2019/06 | Sousse, Tunisia

Managed logistics and project coordination for efficient execution of initiatives.
- Coordinated logistics for projects, ensuring availability of materials and resources for implementation.
- Handled documentation and paperwork for new initiatives, maintaining organized compliance records.
- Fostered communication and collaboration among team members to facilitate smooth execution.
- Monitored project progress and addressed logistical challenges to keep initiatives on track.

📂 PROJECTS

Staffy - Workforce Management App ⬈   2023 – 2023

Hosted on Firebase, this app helps employees track work hours and manage tasks effectively, utilizing Google Maps for accurate sign-in/out based on workplace location. Features include real-time communication through a chat function, task management tools, and schedule organization, available in English, Arabic, and French for a personalized user experience. Administrators can monitor work hours, manage messages, and control access via a dedicated dashboard.

Firebase Firestore, Authentication, Storage, Google Maps API, Flutter, Dart, MVVM, GetX.

Airbnb-like website hosted on servers (School   2022

Project) ⬈

Managed end-to-end development of an Airbnb-like website, overseeing both front-end and back-end. Developed a JavaScript web app using HTML, CSS, and Flask, creating a seamless user experience. Built a custom RESTful API and back-end console for database management, and ensured functionality with a Python unit testing suite. Managed infrastructure with Docker, NGINX, Node.js, and MongoDB for robust performance.

🎓 Certificate

Holberton School Tunisia,   Lac 1, Tunisia

Full Stack Software Developer ⬈

Intensive 2-year program training software engineers

Approach based on project-based learning and peer learning
